objective

My objective is to obtain a web developement position that will challenge my abilities as a developer and problem solver.

experience

Launch School Full Stack Immersive
New York, NY   August 2016—Present

• Created a Ruby Gem called RubyTutor to help beginners get acquainted with the unique Object-Oriented nature of the Ruby Language.
• Utilized Ruby, Sinatra, and HTML/CSS/AJAX to create a web based financial management application to keep track of incomes, expenses, assets and liabilities and generate the appropriate tax bracket.
• Built a todo web application integrated with a PostgreSQL database that kept track users, passwords and tasks.
• Used Ruby on the Gosu library to build a desktop game called WhackARuby similar to Whack A Mole.
• Built static and dynamic web pages from photoshop and sketch files all the way to production.

Freelance Front-End Web Developer
New York, NY   January 2016—Present

• Communicated effectively with clients one-on-one to understand their needs to interpret their designs and desires onto the web.
• Created an extensive multi-page portfolio site for a graphic design client using HTML, CSS, JavaScript and jQuery and using her own designs in .psd format. This site helped her land a six-figure salary design position in New York City.
• Built my own portfolio site using Ruby on the Sinatra framework and hosted on Heroku.

featured projects

RubyTutor
February 2017   github.com/sunny-b/RubyTutor

A Ruby Gem meant to help beginners get used to the language.

Iris Sprague Portfolio Site
March — May 2016   irisprague.co

A portfolio site I built for an award winning graphic designer.
